EMMERack Smart Key Features

Why it's Smart?

Thanks to the SRS (Smart Rack System), designed by Lorenzo Martinelli. The SRS's core element is the W-Shape Module, that plays a multifunctional role in the structural strength, vibration isolation and damping them. The W-Shape Module, as well as each other part of the SRS, is made in ANSI 304 Stainless Steel. Refer to the below box for further information on ANSI 304 specifications.

What's better, ANSI 304 or 303 Stainless Steel?

In the previous model EMMERack was used, as well as other products on the market, the AISI 303 stainless steel due the easier processing with automatic lathes.

But AISI 304 Stainless Steel got superior qualities that make it the best material available to design an Audio Rack structure. Thanks to the reduced presence of Sulfur, AISI 304 Stainless Steel provides undeniable and concrete advantages in terms of quality vs AISI 303.

- brighter color, kept over time
- full resistance against the action of common household cleaning products
- full resistance against corrosion
- totally safe for people with Ni allergy

Grade	Corrosion resistance (passivity)	Ni release in synthetic sweat (µg/cm2/week)	Clinical test (allergic reactions) (%)	Grouping
AISI 304	Yes	< 0,05	0	1
AISI 303	Weak	≈ 0,5	14	2
Ni-plated steel	No	> 70	96	3

How the SRS works?

Thanks to the perfect mass/isolation ratio, the SRS (Smart Rack System) is highly vibration proof with a high adjustable damping factor.

Each shelf is individually isolated by three pairs of "silent blocks", which is free to swing silently and smoothly.

Let you bring over a new frontier of silence, for a smooth listening that you've never tried.

Highlights:

- Based on the new SRS (Smart Rack System)*.
- Modular (1,2,3 or more shelves each available in three heights).
- Fully insulated by a combination of mass and damped suspension.
- Adjustable damping.
- Suspended shelves.
- SRS fully made in 304 stainless steel .
- Shelves: MDF base available in all EMMESpeakers finishes.

Features:

- High damping at all frequencies.
- Stable and safe for kids and animals (one piece construction, no sharpened parts).
- Smooth sounding.
- No quality compromise thanks to all 304 stainless steel structure.
- Modern design.
- Great looking.
- Top furnishing design with, in the same time, a sophisticated technical content.
